'The Life Grid'

The Life Grid is a graphic representation of a particular cycle of learning within the spiritual evolution of mankind. The symbols and their translated meanings are the result of a connection to what is believed to be a creative stream, a store of knowledge and wisdom that transcends what we normally consider to be earthly reality. This connection the writer has gratefully accepted as a God given gift, one that has given her not only a source of enlightenment, but also a profound understanding of the human experience. The purpose of this connection and particularly the Life Grid is as a tool of learning and a means of self-discovery.

Simply study the Grid and look at each symbol one by one, noting their form and the feelings that they evoke. One symbol will always stand out amongst the others. This symbol will relate to you at that particular time. Now note the symbol's corresponding number. The symbols are arranged in eight rows of seven and are numbered left to right, 1-56. Refer to the relevant text and discover the meaning. Remember that the meaning can relate to you on different levels e.g. Emotionally, physically, mentally & spiritually or any combination of the four. Trust in your feelings and explore.

For a more complete reading, the symbol directly above your chosen symbol represents your immediate past and the symbol directly below represents your immediate future. These three symbols and their interpretations will give you a broader indication of your present movement and assist you in determining right decision making for the best possible outcome within your present circumstance.

The secret of unlocking the power of the Grid is developing your own intuition and being able to open yourself to the possibilities that the information can impart. Above all trust your instincts and feelings and don't be afraid to ask questions of the Grid and use it in your own way. The above method is merely a starting point and the knowledge that can be obtained from these fascinating symbols is limited only by your openness to the truth about yourself.

1

This represents a new beginning, a renewed cycle in life. Remember that change can sometimes be only a reflection of reality. True change begins within and then manifests outward onto the physical plane. At this time change is required. A new outlook, project or situation is on offer and life is beckoning you to take it up. Move forward.

2

The second symbol represents the need to search for knowledge and understanding. It is time to realise that in order to progress, one must begin to learn about natural law and cause and effect, then develop knowledge of the true self; what has been and can be. This symbol marks this requirement.

3

Here at this point, goal seeking and advancement on a physical level is necessary. On offer is accomplishment in business or any creative endeavour. Social contact is also beneficial at this time, developing self-esteem and confidence. Pride however, must be placed in perspective and right action and kindness will be rewarded with greater success.

4

This symbol represents the limitations that we so unknowingly place upon ourselves. On some level you feel that the ground beneath you is not solid. Restrictions and uncertainty about something may be frustrating you and causing delays. At this time you are alone and must come to terms with the fact that you are responsible for your actions. You must weather the storm and remain positive, that is the requirement and action for the best outcome.
